

**D**

Add another assembly, fitting two connectors into two inner-triple slots.

Add a third assembly in the same way.

**E**

Fit the fourth inner triple into the two open connectors. Take your time, it can be moved into place without forcing.

After assembling, check each joint to make sure it's in place and clean. If you used rubber bands to hold some joints together, leave them on.

Let the glue dry for 6 hours, clip off the rubber bands if you used any, and your sculpture is ready to display.

Optionally, gloss can be added with a light coat of spray-on shellac

**F**

Now there are only three inner-triple slots left open. To complete the star, fit the last outer triple assembly into them.
