

D

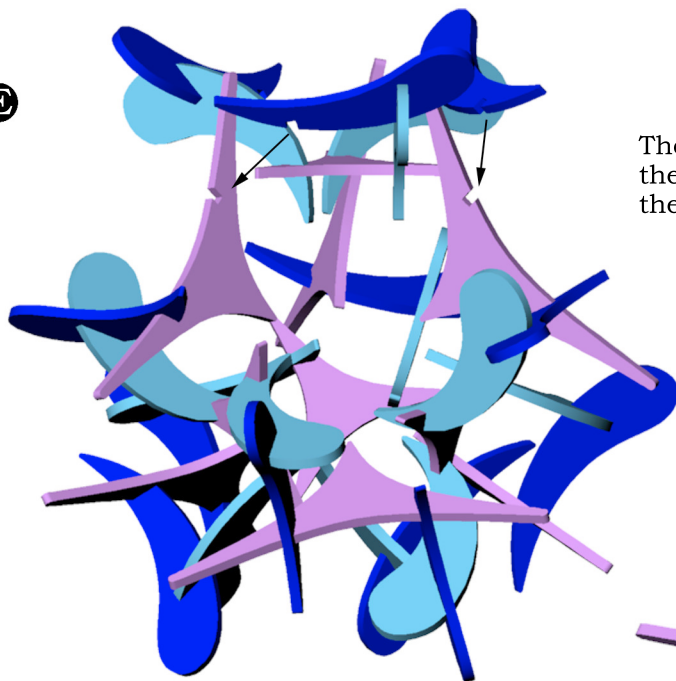

Add two more assemblies, using two more longhorns to link them into a threefold ring.

Three more longhorns hook onto the open dark-drop slots.

E

The last triple assembly hooks onto the three open longhorn slots, closing the piece.

After assembling, check that each joint is in place and clean. If you used rubber bands to hold some joints together, leave them on.

Let the glue dry for 6 hours. Then clip off the bands if you used any, and your sculpture is ready to display.

Optionally, gloss can be added with a light coat of spray-on shellac

F

As usual, the piece is finished upside down. I think it looks best up on three lavender points.
